

Indeling posterpresentaties: Woensdag 14 oktober 2020

Session : 68
Room : Kolff
Time : 12.50 hrs - 13.50 hrs
Content : 11 Moderated bulletposters
Category : Basic science and clinical

Number	Naam presenter	Titel bulletposter
01	E.L. Fu	Comparative effectiveness of renin-angiotensin system inhibitors and calcium channel blockers in individuals with advanced chronic kidney disease: a nationwide cohort study
02	J.J. Hoelbeek	Renal amyloidosis: validation of a proposed histological scoring system in an independent cohort
03	T. Gerrits	Endoglin promotes interstitial fibrosis in chronic kidney diseases
04	M. Salih	Reducing inpatient admissions by ambulating care for patients with acute kidney injury
05	M. Niemantsverdriet	Estimating kidney functioning with ckd-epi is sub-optimal for emergency department patients
06	T.T. Pieters	A plasma creatinine- and urea-based equation to estimate glomerular filtration rate in rats
07	R. Snoek	Pre-implantation genetic testing for monogenic kidney disease: twenty-five-year experience in the Netherlands
08	W.J.C. Feitz	Unravelling the role of neutrophils and nets in patients with shiga toxin producing escherichia coli hemolytic uremic syndrome
09	A. v. Eck v.d. Sluijs	Improving shared decision making for end-stage renal disease patients in the Netherlands
10	J.D. Campeiro	Application of cell penetrating peptide crotamine as a non-viral sirna delivery vector in human renal tubular epithelial cells
11	E.N.M. de Rooij	Especially hypokalemia is a risk factor for all-cause mortality in incident hemodialysis patients

Session : 69
Room : Einstein
Time : 12.50 hrs - 13.50 hrs
Content : 11 posters
Category : Clinical

Number	Name presenter	Title presentation
01	S. Konings	The effects of fgf23 and klotho on vascular calcification in end stage renal disease patients; a cross-sectional study.
02	J.J. Hoelbeek	B-cell aggregates in protocol renal allograft biopsies
03	G. Wijngaarden	Thermal perception and body temperature (t) in chronic hd patients: a comparison between standard hd (shd), cool hd (chd), low-volume hdf (lvhdf) and high-volume hdf (hvhd): the hollant study
04	F. Veltkamp	Prevention of relapses with levamisole as adjuvant therapy to corticosteroids in children with a first episode of idiopathic nephrotic syndrome – an international, double-blind, placebo-controlled ra
05	F. Veltkamp	Determining concentrations of levamisole and prednisolone in plasma and saliva in children with idiopathic nephrotic syndrome using lc-ms/ms
06	F. Veltkamp	The use of generic and disease-specific patient reported outcome measures in daily clinical practice of a paediatric nephrology unit.
07	S.Y. Ismail	Factors influencing access to kidney transplantation (fiat): a qualitative study on stakeholders perspectives
08	L.R. Claus	Genepher: building a data- and biobank for (suspected) hereditary renal disease
09	A.A. Bonenkamp	Home dialysis patterns in elderly patients in the past 20 years
10	A.A. Bonenkamp	Selection of patients suitable for home dialysis by a social worker
11	S. Redeker	National implementation of the kidney team at home educational intervention

Session : 70
Room : Copernicus
Time : 12.50 hrs - 13.50 hrs
Content : 4 posters
Category : Basic science

Number	Name	Title presentation
01	J.A.J. van der Wijst	Structural insight into the regulation of the epithelial calcium channel trpv5
02	P.A. Rootjes	Intra-dialytic release of extracellular vesicles (evs) is independent of the mode of dialysis. a comparison between standard hemodialysis (shd), cool hd (chd), low-volume hemodiafiltration (lvhdf) and
03	F. Boulogne	Predicting kidney-disease genes using gene-expression data of 746 kidney rna-sequencing samples
04	G.H. Khan	Levamisole, a potential adjuvant drug for idiopathic nephrotic syndrome, acts as a suppressor of t cell activation
